

SUPPORTING OUR COMMUNITY STARTS WITH LISTENING...

This summer, we extended the public comment period on the draft environmental impact report on our **Student Housing West** proposed project. Open feedback continues to contribute to important changes to the proposed project plan.

"

An architecture here must grow out of the problems, restrictions and potentialities of the site.

EVOLVING THE SOLUTION

- ✓ Redesigned Early Education Services for pre-K children and after school daycare offer improved features and aesthetics.
- ✓ Revised grading plan for improved sight lines and reduced building visibility.
- ✓ Redesigned waste water treatment facility and associated water recycling infrastructure will reduce use of potable water on the site.
- ✓ Modified storm water system to ensure excess storm water is captured and disposed of properly to minimize impact to adjacent watersheds.
- ✓ Relocated maintenance barn and community garden to make better use of topography.
- ✓ Refined second driveway on Coolidge Drive to align with safe pedestrian and traffic engineering principles.

BETTER TOGETHER

We continue to look closely at every idea put forth by all our campus and community members.
